

## How Water, Air and Climate can be conducive for the health of a common man in the country?

When we understand and follow the following:-

**Jal (water)+Vayu (air)= Jalvayu (climate)**

1. It is very essential to believe that **climate is physical *Brahma*, water is physical *Vishnu* and air /trees are physical *Shankar*.**
2. Therefore, it is essential that:-

Other than the above, there is no way out to check Global warming.

3. **By doing the above:** You will get greenery all around and natural beauty in the form of physical ***Maha Saraswati***.
4. **By doing the above:** You will get trees with full of fruits and farms with full of rich harvest/crops in the form of physical ***Maha Lakshmi***.
5. **By not doing the above:** You will get earth quakes, floods, draughts, cyclones etc (natural calamities) in the form of ***Maha Kaali***.

In the past few months many states of our country were under floods, which resulted into loss of hundreds of lives and property worth crores of Rupees, simultaneously now there is threat of draught in a part of the country.

Have we ever tried to know what are the reasons of all this? Practically it is due to Global warming only and its only remedy is: Respect for trees, beautification of rivers and prohibition of pollution and that will result into welcome of the nature.

If you follow the above principles, you will get greenery and natural beauty, trees full of fruits, farms full of rich harvest/crops etc all around.

If you don't follow the above principles, you will get earth quakes, cyclones, floods, and draughts etc.

If you wish to build our country Hindustan a Heaven, it is essential to protect our lifeline i.e. ***Jal (water), Vayu (air) and Jalvayu (climate)*** to check Global warming and to avoid natural calamities and to get a prosperous life.
