

## **What should be the Reservation policy which unites the country?**

**When we implement the following Reservation policy:-**

### **Unity Reservation policy: (A sure shot formula of unity)**

1. Reservation should be in four categories – Highly Schedule Caste (HSC), Schedule Caste (SC), Highly Backward Caste (HBC), and Backward Caste (BC).
2. Member of Highly Schedule Caste should get the reservation of HSC only on marrying inter-caste in HSC. Similarly SC, HBC, and BC should also get a reservation.
3. Percentage of reservation should be the maximum to HSC, a little less to SC, a little less to HBC and a little less to BC and in the above sequence only.
4. If any member of HSC marrying inter-caste in HSC and shifting territory also, he should get a little extra benefit. Similarly in other categories also one should get the additional benefit.
5. Reservation should be limited to the self and the children only. If a child gets married inter-caste, only then his children should also get a benefit of that category.
6. Marriages should be performed other than these four caste i.e. caste of the mother, caste of the father, caste of the paternal grandmother and caste of the maternal grandmother.
7. Category of normal class should get the reservation of that class in which he marries.
8. If member of HSC marrying in SC, HBC, BC or normal class only then he should get a reservation and similarly, it should be applicable in other categories.
9. Immovable property should be registered in the name of women only. Registration of property should be done free of cost and a provision of easy/early availability of loan without interest should also be made, thereby security of both women and men will be stronger.

If you wish to build our country Hindustan a Heaven, it is essential that such a reservation policy should be there in the country, which unites the countrymen.

**Shri Paramdham, Meerut**

## What is the need for a Reservation?

What is the need for a reservation in the country at present? Only reason for that is: Opportunities are less and seekers are many more. If a reversal of this happens then, do you think that anyone will seek for a reservation?

Certainly not!

The day provisions of “**How our country Hindustan can become a Heaven?**” are applied and implemented, automatically this position will reverse, within a span of 1-2 years and nobody will seek for a reservation.

Let us come together for this cause and create such a situation.

If there is any need for the reservation, it is to improve security of men and women by implementation of the following provision:-

### **Immovable property should be registered in the name of women only**

**Immovable property should be registered in the name of women only** by whom security of men and women will improve. A man may have differentiation between the family members but a woman rarely does so, because she is a mother and generally she doesn't differentiate between family members. By this action the social evils i.e. problem of **feticide and dowry** will reduce drastically. **It will improve the respect for the women in the society and every parent will wish / desire that they should have a girl child only.**

At present Muslim women is facing lots of problems due to *Talak Talak Talak*. (A divorce may take place by uttering these words.) By implementation of this provision i.e. Registration of immovable property in the name of women only, the security of a woman will improve and the problems related to **divorce and polygamy** in Muslims will reduce drastically.

If you wish to build our country Hindustan a Heaven, it is essential that women must get a respect in the society and for that immovable property should be registered in the name of women only.
