

A Question: Can our country Hindustan become a Heaven?

Answer: Certainly yes

How: It can be done by eradication of poverty, corruption and terrorism and steps are:-

1. **Abolish Income tax and allow black money to be deposited in banks:-** An estimated say up to Rs.15 - 20 lac crore will be deposited in banks. By this action, other than the shares and bank balances all financial products will be no more. As banks will be having surplus funds with them, therefore, interest rate on bank deposits will become zero.

Note: No action of any sort should be taken against any one on deposit of cash or foreign exchange.

2. **Availability of loans to all, including government @0.01% p.a. interest:** It will help a person of caliber or capability or potential or having any qualification or having any special feature to get funds easily. Funds for any activity or any project will be no problem for the government as it can borrow these funds (say up to Rs. 15 - 20 lac crore) any number of times. This money belongs to the country and will remain in the country, therefore, will be a mere book entry only and not refundable/ payable at all.

Loan Rs. 10000000 (One crore)

Interest in a year Rs. 1000 (One thousand)
--

3. **There should be only three taxes and that too progressive.** No other tax of any sort should be imposed other than these three taxes and Equalization tax.

Excise Rs.	Sales tax	Service tax	Tax rate
180.0-189.0 lac	24.0-25.2 lac	12.0-12.6 lac	1%
189.0-198.0 lac	25.2-26.4 lac	12.6-13.2 lac	2%
	_____	_____	_____
261.0-270.0 lac	34.8-36.0 lac	17.4-18.0 lac	10%

Tax should be imposed on every product and service other than raw materials including minerals and agricultural produce. The person who is consuming more should pay more.

4. Limit of Income

- Minimum and maximum salary should be Rs. 5000 p.m. and Rs. 5 lac p.m. respectively.
- Minimum pension for any person should be Rs. 5000 p.m. that has completed 60 years of age and in case of parents of handicapped children this age limit should be 55 years. For working employees/ workers it should be 2.5% per annum for every year completed or 50% of last salary drawn whichever is more. The employees who have retired earlier should get a pension on the basis of present salary in the same cadre. A provision for a Family pension should also be made and it should be 50% of salary in case dependents are less than two, otherwise it should be 75% of the last salary drawn.

It should be the responsibility of the government to pay pension instead of an employer.

A special provision for eunuch/transgender/*hijdas* and prostitutes should be made for their rehabilitation, employment and pension.

- Minimum unemployment allowance should be Rs. 5000 p.m.

5. Limit of Assets for an individual:-

1. Property: Not more than one house and/or a shop/agriculture land within 25km (aerial distance)
2. Gold: 200/50 gram for a female/ a male.
3. Diamonds: 5/1 carat for a female/ a male.
4. Cash: Rupees 10,000/- in coins per person.
5. Car: One for up to 5 members of a family and business car should be a separate.

6. Bank balance: Unlimited (subject to Equalization Tax – E.T.)

Equalization tax on Bank balances:- A miraculous tax for leaps and bounds progress of the country (देश दिन दूनी रात चौगुनी उन्नति करने की बजाय दिन दूनी रात सौगुनी उन्नति करेगा) This tax should be on bank balances and anyone spending this tax amount on infrastructure/social/welfare /charitable projects, up

to 95% of the amount spent should be refundable and a provision of a salary up to 50% out of the remaining amount of 5% should also be there.

Infrastructure/social/welfare /charitable projects under Equalization tax:- Management of water, air, transport, tourism, energy, housing, disabled, waste, agriculture, village/urban development, cottage industries, cooperative movement, stadium/ place for social and cultural activities, control of pollution, free distribution of goods and services, acts for providing livelihood, inter caste/community marriages etc.

Rates of Equalization tax:- On Rs. 5 lac-nil, between-5-10 lac ¼% p.a., 10-20 lac ½% p.a., 20-50 lac 1% p.a., 50-100 lac 2% p.a., 100-500 lac 5% p.a., 500-1000 lac 10% p.a., 1000-2000 lac 20% p.a. and above 2000 lac 25% p.a.

Equalization tax (*Samta kar*) to make:

Rich Man = Not Poor Man

Poor Man = Ordinary Man But

Funds from Equalization tax will help to complete all the above mentioned projects within 5-10 years (including at least one home in every block of villages and every city of the country for disabled). It will result in to lower tax rates, more collection of taxes and no evasion of taxes, tremendous job and other opportunities in the above mentioned Infrastructure projects. No fear, better quality of life, cheaper products and agricultural produce and all countrymen busy in creation and development will create bright future of the country. There will be no difference between the government and a common man, as all will contribute towards the development and will help in, to provide honorable and prosperous life for every citizen of the country.

7. Police Reforms:

1. Working hours should be 28 in a week. At present it is 24x7 which affects their health very badly.
2. Salary should be double.
3. If a person is having stomach outside his belt, he should resign himself. (A reasonable time should be allowed to keep them physically fit).

8. Judiciary Reforms:

1. In every case a time limit should be fixed on the basis of its nature of the case. No case in any court should take more than six months or six hearings whichever is earlier.
2. There should be a bench of High court in every five districts and a bench of Supreme Court in every five states.
3. All old/pending cases should be closed.

All the above reforms are possible only when Political reforms are made, which are as under:-

9. Political Reforms:

1. Election of P.M. and C.M. should be directly by the public.
2. Pension of M.P. and M.L.A. should be equal to their salary and should not have any other source of income.
3. If a person (self, spouse and minor children) is having any immovable property, that should be donated to the country.

These provisions will provide entry to only those politicians who really wish to serve the Nation.

Bureaucracy: It is said that bureaucracy is not having back bone. When all the above three systems (i.e. police, judiciary and political) are in place, automatically this system will also function properly (can be molded as desired).

In addition to the above the following should also be implemented to support these systems:

1. **Circulation of Coins instead of currency notes** and anyone keeping cash in coins for more than Rs. 10000 should be treated as a traitor and punishment should be equal to 10 years imprisonment of *Kalapani*. (*Kalapani* – should be sent the farthest up to 5000 k.m. where no one of his known person is allowed to meet).
2. **Ban on Arms and Ammunition** – Anyone keeping arms and ammunition other than by police and army should be treated as a traitor and punishment should be a death penalty only, which will improve security of every citizen of the country. If no one in the country will be having arms and ammunition, automatically security of every citizen will improve.

3. Any person involved in Drugs or Adulteration or keeping Arms and Ammunition or dealing with professional blood donors/ trading in human organs or encouraging Caste differentiation should be treated as a traitor and penalty should be death only.

Note: No prosecution under present or future laws should be initiated against the person who is surrendering arms and ammunition. The person who is rebellion, looter, terrorist or Maoist should not be punished under any law and job opportunities should be created for them on surrender.

How Rupee one will be equal to one Dollar within one year of the implementation:-

By implementation of the provisions mentioned in the details given here under, Rs. 1/- will be equal to \$1 within a year's time because:-

- By having Limit of gold, we will become an exporter of gold instead of an importer.
- By Waste management we will become an exporter of organic fertilizer after 5 years or so instead of an importer of chemical fertilizers.
- By energy management, import of oil will reduce drastically. Solar power capacity should be increased to 1000 times of the existing capacity in coming 10 years to reduce burden of oil. In future all sources of energy other than solar power are going to be obsolete.
- By setting up Cottage industries, we will become an exporter of various goods after 5-10 years or so instead of an importer of everything from China.
- By Implementation of Transport and Tourism management, inflow of foreign exchange will improve manifold and Many more.

Although the above measures may take 5 to 10 years to implement but its affect will be visible within one year and after 10 years Rs. 1/- may be equal to \$100.

From where the Government will get the money once Income tax is abolished:-

- Manifold collection of taxes (Excise, Sales tax and Service tax) and there will be no scope for evasion/ theft of taxes after circulation of coins.
- Equalization tax from those who are not contributing towards the taxes or projects.
- Government can borrow @ 0.01% p.a. interest, any amount say 10/ 20/ 50/ 100, 1000 lac crore as this amount is mere a book entry and circulation only, which is not refundable/ payable at all.

How circulation will increase many times?

1. Minimum pension to senior citizens @ Rs. 5000 p.m. to every person who is above the age of 60 years.
2. Pension to employees and permanent laborers @2.5% of last salary drawn for every year of service completed or 50%, whichever is more. In case any employee who retired long back, pension should be at the rate at present in the same cadre. (OROP)

3. Family pension @ 50% if members in the family are less than 2 otherwise 75% of the salary/pension last drawn.
4. Minimum unemployment allowance of Rs. 5000 p.m. or @ 2.5% of last salary drawn for every year of service completed or 50%, whichever is more. After 6 months this amount should be reduced to $1/2^{\text{nd}}$, after 6 months – $1/3^{\text{rd}}$, after 6 months $1/4^{\text{th}}$ and after 6 months – $1/5^{\text{th}}$ after that it should be known as *Nikhattu* allowance (useless person).
5. For the development of villages, an amount of Rs. 1 crore to every village where population is less than 1000, Rs. 2 crore where population is less than 2000, Rs. 3 crore where population is less than 5000, Rs. 4 crore where population is less than 10000 and Rs. 5 crore where population is more than 10000 should be given. It should be a continuous process and whenever an amount given is about to exhaust, immediately that should be replenished, say after 90% of the limit.
6. Rs. 3000 p.m. to every woman and unemployed youth in cities and Rs. 2000 p.m. in villages for the purpose of one time free food in a day.
7. At later stage (when infrastructure in the country is ready) a provision of Rs. 1 crore to every person in the country should be given, which can be spent for the purpose of tourism in a month in a year to everyone and if there is any surplus left, that should be refunded to the government.
8. Salaries of employees of the government and various other organizations like banks, professionals etc to be managed and paid by the government.
9. Fresh loans of all types' @0.01% p.a. interest to all easily, who are having capacity or capability or potential or qualification or any special feature.

These expenses, loans and amount paid for various schemes will help in increasing circulation of money many times and in return our country will progress, which will help in prosperity of the country and its elevation.

In nutshell money of the country, will be used for the country, by the country, within the country and for the people of the country.

On Implementation of the above, it will help in reduction of more than 95% and up to 100% of:

Terrorism, Maoism, gangsters, mafias, drugs, sale purchase of women and children, smuggling, extortion, cyber crime, contract killing, kidnapping, adulteration, surveillance, illegal and immoral acts, human organs trade/ professional blood donors, speculation, corruption, black marketing and fraudulent activities etc.

The picture of the country will be as under:-

1. There will be no poverty, corruption and terrorism.
2. Every citizen will be able to meet all his requirements of day to day life easily i.e. food, clothing, housing, education, health services, security, water, electricity and transport.
3. Every citizen will have opportunities for livelihood on the basis of one's caliber and potential i.e. Student, farmer, laborer, employee and businessman / self employed.
4. Life of disabled around us will be comfortable i.e. orphans, old and handicapped.
5. Everyone will be having facility of equal education and health services and that too free. In case of dispute, justice will be made within time and country will be having such a Reservation system which unites the countrymen rather than breaking them or the need for the reservation may end / not arise.
6. *Jal (water), Vayu (air) and Jalvayu (climate)* will be conducive to health as *jal+vayu = jalvayu*. (On cleaning/ controlling these, problem of Global warming will vanish and other than this, there is no remedy in the world).
7. Social evils will be minimum or won't be there.
8. Everyone will be getting his share of profit/ property (which is under the earth) in the wealth of the country.
9. Political system will be such which works for the nation and entry only for those politicians who really wish to serve the nation. Police as a friend, judiciary for timely justice and bureaucracy for helping to make a strong democracy.

All this can be done

and its only *Mantra* (formula) is:-

Sanghe Shakti Kaliyuge

(In *Kaliyug* the unity without caste differentiation is the power)

To sum up: There will be an equality amongst countrymen, improvement in their capacity and that will bring politeness in the society/ country. By this move every citizen will get respect, rights and opportunities.

Shri Paramdham, Meerut
